Group IV has a special technical feature where transverse welds are formed by a plurality of ultrasonic welding horns with their lower edges arranged collinearly. Group V has a special technical feature where at least one welding horn acts against a fixed anvil provided with a surface coating which acts as a cushion for the welding horn. Group VI has a special technical feature of a magnetic means at an exit of the coiling section. Group VII has a special technical feature of a pocketed spring assembly with a depth of 20 cm or more.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
